engineering,
construction,
and service
of Modular
Office Spaces.*

MODULAR OFFICES

Angstrom Technology is your modular office expert with 27 years of experience, specific to design, engineering, construction and on-going service of modular office spaces with superior customer satisfaction.

Modular Offices

Angstrom Technology's modular office systems are pre-engineered and manufactured to fit your application. All materials come completely finished and ready for construction. Angstrom's wide variety of materials, finishes and colors allow owners, architects and contractors the freedom to design anything from high profile two story administrative offices to in-plant industrial offices.

Our construction can be completely dismantled, relocated and reassembled. Because of this, modular components are considered equipment. This is a huge tax advantage. Therefore they can be depreciated over 7 years as opposed to 39 years required with permanent construction. This results in immediate reduction in taxes and saves you money.

No job is too small or too large for us at Angstrom Technology. The pre-engineered modular wall system we use for modular construction provides flexible solutions to fit your ever changing needs. We have designed modular offices for a variety of customers.

Top 10 Reasons to Choose Modular Construction

1. Versatility

Expandable, relocatable or reusable.

2. Quick Installation

Pre-engineered for efficient installation.

3. Clean Installation

The install requires minimal on-site construction and fabrication.

4. Reduced Construction Labor Costs

Prefabricated components install quickly and easily, minimizing down time.

5. Ease of Coordination

We work to install on your schedule.

6. Reduced Design Time

Modular components are pre-engineered.

7. Consistent Quality & Appearance

We manufacture your room to exact specifications.

8. Low Maintenance

We provide durable, prefabricated wall panels that require little maintenance beyond occasional surface cleaning.

9. Tax Advantages

Depreciation for conventional construction is 39 years, while depreciation for modular construction is only 7 years.

10. Environmentally Friendly

Less construction waste with modular building components.

About Us

Angstrom Technology was founded in 1989 to provide the nation's best modular office solution. From the start our mission was to be the industry leading experts on modular office design, build and service. We never wavered from this mission.

We employ a knowledgeable and friendly staff who take great pride in the products and services we provide to our customers. Our employees are Angstrom's greatest attribute, and the quality of our people and their work is unsurpassed in the industry. Angstrom Technology is a national company with a corporate office located in Michigan, and sales offices throughout the United States.
