

See what nothing looks like.

It's true; Technical Air Products is a leading manufacturer of modular cleanrooms. However, we also manufacture a variety of cleanroom accessories, and other clean air products. Bottom line, we design and manufacture products that reduce air contaminants, for any operation, down to basically...“nothing.” Whether you need a pass-thru for your cleanroom, or you need a laminar flow bench for your manufacturing application, or you need a reliable way of transporting products between critical environments, we have a solution for you.

Cleanroom Accessories

Over our 25+ years in business, we have designed many clean air solutions to our customers' needs. The following is a list of our more standard cleanroom accessories. However, if you have a unique requirement, our engineers can work with you to design a solution specifically for your operation.

WALL AND CART PASS-THRUS

Wall and Cart Pass-thrus are the best way to control cross-contamination in a critical environment. Technical Air Products manufactures standard size wall and cart pass-thrus, offering the best price and lead-time to meet your needs. Custom sizes and options, such as HEPA filtered pass-thrus, are also available.

LAMINAR FLOW WORKSTATIONS (CLEAN BENCHES)

If laminar flow is required for specific processes inside your cleanroom, or if you just need to control air contamination for a small area of your manufacturing process, free-standing or portable laminar flow workstations are the perfect solution. Standard sizes are available for the best price and lead time. Custom sizes and options can also be designed by our engineering staff.

BATTERY-POWERED MOBILE HEPA CABINETS

If you have a need to transport product from one critical environment to another, without having to wipe it down, our battery-powered mobile HEPA cabinets are what you need. The battery can run the motorized HEPA fan filter unit for over 30 minutes on a single charge. In between uses, you just plug the on-board charging system into a wall outlet to recharge the battery for its next use.

YOUR MOST DEDICATED FANS.

Every clean air product starts with a motorized HEPA or ULPA filter module. Technical Air Products has over 25 years of continuous improvements built into its family of motorized fan filter units. The result...a perfect combination of quality, performance and price. Technical Air Products offers a wide variety of fan filter units to meet any application. Call us today, and see how our fans can go to work for you.
